Subject: Kaiser Aluminum

Hi Jeremy-

I would like to touch base with you about the Kaiser Aluminum site in Spokane. I saw some recent news about different treatment technologies being implemented for the groundwater.

I was curious, what is the regulatory authority being used for this cleanup? Is CERCLA invoked in any way, possibly as a state-lead CERCLA clean-up?

I was also curious if the site ever submitted a Notification of PCB Activity form to EPA HQ identifying the R&D activity?

Thank you,
